## Honeywell Valve Distributors

The basis of the relationship between **Honeywell, UAE** and **Abu Saeed Trading Company** is the fact that we distribute products supplied by Honeywell. which is a manufacturing company. We supply valves, thermostats, refrigerant etc. through retail as well as whole sale outlet across UAE.

### **VALVE MATERIALS: ENSURING SAFETY AND LONG-LASTING PERFORMANCE**

Depending on your intended use, the materials with which your valves are made might be a critical aspect in ensuring safe operation and reducing maintenance and replacement costs over the life of your operation.

**Abusaeed.com**

Stainless steel valves are excellent options in a range of processing environments, including those involving corrosive media (such as chemicals, saltwater, and acids), environments with strict sanitation standards (such as food and beverage manufacturing and pharmaceuticals), and processes involving high pressure or high temperatures.

However, if you are processing solvents, fuels, or volatile organic compounds (VOCs), choosing a valve material from a non-sparking material – such as brass, bronze, copper, or even plastic – is often a better option. In addition to selecting the correct body material, internal (wetted) trim parts should be evaluated for chemical compatibility as well as pressure and temperature limitations.

Above all, we consolidate the valves and other products and resell the products. We are trusted distributor also sometimes referred to as wholesaler of Honeywell, UAE.
